

1. EPICs & Requirement Mapping

The Lab 1 requirements were converted into five coherent Agile epics for the student project portfolio and showcase app. This preserves the functional and non-functional scope while organizing the work into deliverable themes.

Epic	Name	Lab 1 basis	Description
EPIC-1	Student Profile & Portfolio Setup	FR-001	Create student profiles and portfolio pages with personal information, education, contact details, and a professional introduction.
EPIC-2	Project Showcase & Details	FR-002, FR-003	Allow students to add projects with descriptions, technologies, links, images, and outcomes so their work can be presented clearly.
EPIC-3	Skills & Achievements	FR-004, NFR-002	Organize technical skills, certifications, achievements, coursework, and experience into structured sections that are easy to review.
EPIC-4	Portfolio Search & Discovery	FR-005	Allow visitors to browse, search, and filter student portfolios and projects by skills, technologies, categories, and interests.
EPIC-5	Secure & Responsive Portfolio Access	NFR-001, NFR-002	Provide secure portfolio access and a responsive user experience across desktop and mobile devices while maintaining reliable performance.

2. Agile Backlog & Story Point Assignments

The backlog contains 10 user stories grouped under the five Jira epics. Priorities are set to High and estimates use the Fibonacci sequence, as required by the handout.

Issue	Story	Epic	Priority	SP
KAN-6	US-1.1 — Create Student Profile	Profile & Portfolio Setup	High	5
KAN-7	US-1.2 — Edit Portfolio Information	Profile & Portfolio Setup	High	3
KAN-8	US-2.1 — Add Project Showcase	Project Showcase & Details	High	5
KAN-9	US-2.2 — Add Project Details & Links	Project Showcase & Details	High	5
KAN-10	US-3.1 — Manage Skills & Achievements	Skills & Achievements	High	3
KAN-11	US-3.2 — Add Certifications & Experience	Skills & Achievements	High	5
KAN-12	US-4.1 — Search Student Portfolios	Portfolio Search & Discovery	High	5
KAN-13	US-4.2 — Filter Projects by Technology	Portfolio Search & Discovery	High	8
KAN-14	US-5.1 — Secure Portfolio Access	Secure & Responsive Access	High	3
KAN-15	US-5.2 — Meet Responsive Performance Target	Secure & Responsive Access	High	8

Total backlog estimate: 50 story points. Planning-poker rationale: 3-point stories represent contained work; 5-point stories represent moderate complexity/integration; 8-point stories carry higher uncertainty, validation, search/filter, security, or responsive-performance risk.

3. Jira Backlog Evidence

The following screenshot is the captured Jira backlog showing all 10 work items, their Jira issue keys, and their parent epics.

The screenshot shows a Jira backlog in a Safari browser window. The browser's address bar displays 'satya-kallakuri.atlassian.net'. The Jira interface includes a sidebar with navigation options like 'For you', 'Recent', 'Starred', 'Ap...', 'Plans', 'Spaces', 'Filters', 'Dashboards', 'Teams', 'Goals', 'Projects', and 'Customize sidebar'. The main content area shows the 'student project portfolio and showcase app' space in 'Backlog' view. A search bar and a 'Filter' button are present above the backlog list. The backlog contains 10 work items, each with a Jira issue key, a title, an epic link, a status, and an assignee icon. A 'Quickstart' button is visible in the bottom right corner.

Issue Key	Title	Epic	Status	Assignee
KAN-6	Create Student Profile	Profile & Portfolio	To Do	
KAN-7	Edit Portfolio Information	Profile & Portfolio	To Do	
KAN-8	Add Project Showcase	Project Showcase	To Do	
KAN-9	Add Project Details & Links	Project Showcase	To Do	
KAN-10	Manage Skills & Achievements	Skills & Achievements	To Do	
KAN-11	Add Certifications & Experience	Skills & Achievements	To Do	
KAN-12	Search Student Portfolios	Portfolio Discovery	To Do	
KAN-13	Filter Projects by Technology	Portfolio Discovery	To Do	
KAN-14	Secure Portfolio Access	Secure & Responsive	To Do	
KAN-15	Meet Responsive Performance Target	Secure & Responsive	To Do

4. Sprint 1 Simulation

Planned duration: 1 week Stories: KAN-6 to KAN-10 Planned capacity: 21 SP

Issue	Story	SP	Final status
KAN-6	Create Student Profile	5	Done
KAN-7	Edit Portfolio Information	3	Done
KAN-8	Add Project Showcase	5	Done
KAN-9	Add Project Details & Links	5	Done
KAN-10	Manage Skills & Achievements	3	Done

Captured evidence of the active sprint shows student portfolio work moving from To Do into In Progress before completion.

Figure 2. Jira Active Sprint evidence during Sprint 1 progress simulation.

5. Sprint 2 Simulation

Planned duration: 1 week **Stories:** KAN-11 to KAN-15 **Planned capacity:** 29 SP

Issue	Story	SP	Final status
KAN-11	Add Certifications & Experience	5	Done
KAN-12	Search Student Portfolios	5	Done
KAN-13	Filter Projects by Technology	8	Done
KAN-14	Secure Portfolio Access	3	Done
KAN-15	Meet Responsive Performance Target	8	Done

Sprint 2 was started after Sprint 1 was completed. The captured Jira board shows the five remaining portfolio stories initially in To Do.

Sprint 2 was started after Sprint 1 was completed. The captured Jira board shows the five Sprint 2 stories initially in To Do.

Figure 3. Jira Active Sprint evidence for Sprint 2 at the start of execution.

6. Sprint Completion Evidence

Both one-week sprint simulations were completed. The final Sprint 2 board shows all five Sprint 2 items in Done, with no remaining To Do or In Progress items.

Figure 4. Jira board after Sprint 2 completion: 5 Items in Done.

7. Burndown Charts

The burndown charts track remaining story points across each seven-day sprint. The planned work reaches zero by the end of each sprint.

Figure 6. Sprint 1 burndown — 21 SP → 0 SP.

Figure 7. Sprint 2 burndown — 29 SP → 0 SP.

Interpretation: Sprint 1 completed 21 planned story points and Sprint 2 completed 29. The stepwise decline represents student portfolio features being completed in batches during the simulated sprint rather than continuously.

Interpretation: Sprint 1 completed 21 planned story points and Sprint 2 completed 29. The stepwise decline represents work being completed in batches during the simulated sprint rather than continuously.

8. Reflection Questions

1. Did your estimations reflect the actual effort?

Yes, at a relative estimation level. The 3-point stories represented contained work, while 5- and 8-point stories represented greater complexity, integration effort, or uncertainty. The larger estimates for technology filtering and responsive-performance work reflect additional integration and validation.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized around dependencies and user value. Profile setup and portfolio information come first because later showcase and discovery capabilities depend on structured student data.

3. How did your simulated sprint align with your plan?

The two simulated sprints followed the planned order and completed all selected stories. Sprint 1 established the profile and project showcase foundation, while Sprint 2 completed skills, discovery, security, and responsive-access work. The Jira board progression followed To Do → In Progress → Done.

4. What insights did the burndown chart give about your team's capacity?

Both charts reach zero remaining work within the planned one-week sprint. Sprint 2 carried more points than Sprint 1, indicating higher planned capacity and greater uncertainty because it contains the 8-point filtering and responsive-performance stories.

Because it contains the 8-point expert and 8-point performance stories, in a real project, repeated deviation from the ideal guideline would be used to adjust future capacity and sprint planning.
